

WHAT IS PALLIATIVE CARE?

WHEN IS PALLIATIVE CARE NEEDED?

WHO NEEDS IT?

29,000 Children with life threatening or life-limiting diseases in Bangladesh need palliative care each year

WHAT ARE THE GAPS ?

98% of children needing palliative care are unable to access the care that they need

WHAT ARE THE BARRIERS?

Poor public awareness of how palliative care can help

Lack of knowledge and skills in palliative care among health care workers

Lack of palliative care at local health care facilities

What Will The Children's Palliative Care Initiative Do?

Implement the 2014 World health assembly Resolution 67.19 on palliative care, by:

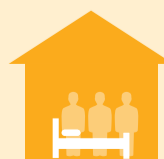

Encourage the integration of palliative care into National Health Policies

Raise awareness about the need for palliative care for children among the general public and health care workers

Provide training about palliative care to health care workers

Support existing palliative care services and encourage development of more services at hospitals, primary health care centres and in the community
